

Drip Tape-Great for Row Crop & Low Water Pressure Irrigation

Drip tape for irrigation is a cost-effective short-term solution for agricultural and row crop irrigation especially at low pressures. The tape is engineered to provide uniform flow rates and resist blockage when using graywater or rainwater, even in gravity-fed systems using on-site storage tanks.

The tape design employs two independent anti-plugging systems: Vortex Flow Action, which prevents clogs by keeping particulate in suspension; and the Expanding Flow Channel, which reacts to blockages by actually changing shape, often purging even the toughest particulate build-up. Additionally, manufacturing process creates a precision-molded flow channel with a large cross-section, which can pass larger particulate and deliver the uniform flow rates you demand.

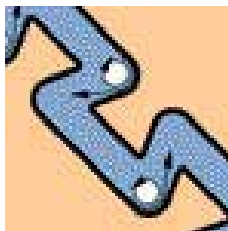

We currently stock 10 mil tape which has an effective life of three or four years, longer if buried. Runs should be on level ground and kept flat. At 10 psi water will be distributed at the rate of 40gph per 100' length. Drip tape is shipped flat and inflates with water pressure.

DRIP TAPE PRICES

	100' roll	
1DT10M100	8" Spacing 40 gph per 100'	\$8.95
	1000' roll	
1DT10M1000	8" Spacing 40 gph per 100'	\$81.50

VORTEX FLOW ACTION

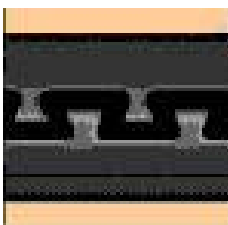

Designed-in turbulence keeps particles suspended and moving through every corner, twist, and

turn of the flow channel. With no place to rest, particles are flushed out continuously, before they build into real problems.

PRECISION-MOLDED CHANNEL

Precision engineering ensures large, uniform channels. Each contour is designed and molded to eliminate variability and deliver uniform flow rates. This tape keeps on performing-run after run.

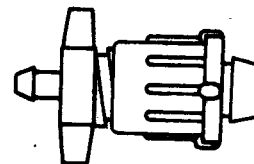

EXPANDING FLOW CHANNEL

This feature creates a truly remarkable "second line of defense" against plugging during high-contaminant conditions. The flow channel expands to purge an obstruction and restore flow.

DRIP TAPE FITTINGS

Do not exceed 50' drip tape runs when using this fitting!

BARB X LOC SLEEVE

1DT025.....99¢

Do not exceed 50' drip tape runs when using this fitting!

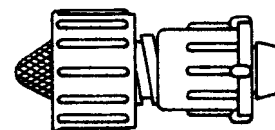

1/4" BARB X ON-OFF X LOC

1DT025S0.....\$2.50

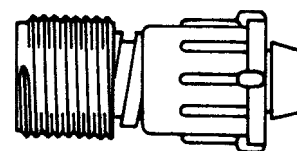

LOC SLEEVE COUPLING

1DTC.....98¢

FEMALE HOSE X LOC SLEEVE

1DTFHT.....\$2.09

1/2" MPT X LOC SLEEVE

1DT05MP.....\$1.05
