

Irrigation & Automation Options

Watering Methods

Drip

- Slow deep watering
- Exact watering to plant needs
- Fewer weeds, less runoff & water use

Spray

- Best for lawns & dense planting up to 15 feet wide
- Long-term durable solution
- Good uniformity when designed well

Rotor

- Slow watering gear-driven rotating sprinklers
- Great for large areas
- Uses fewer sprinklers, valves & less pipes

MP Rotator

- Matched precipitation (MP)
- Rotating pop-up nozzles water slowly, uniformly
- 10 to 30' wide

Automation Types

Hose bib automation

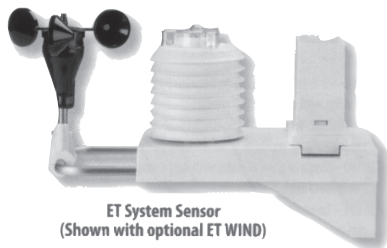

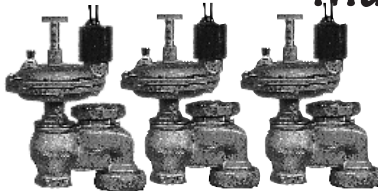

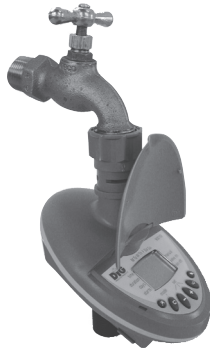

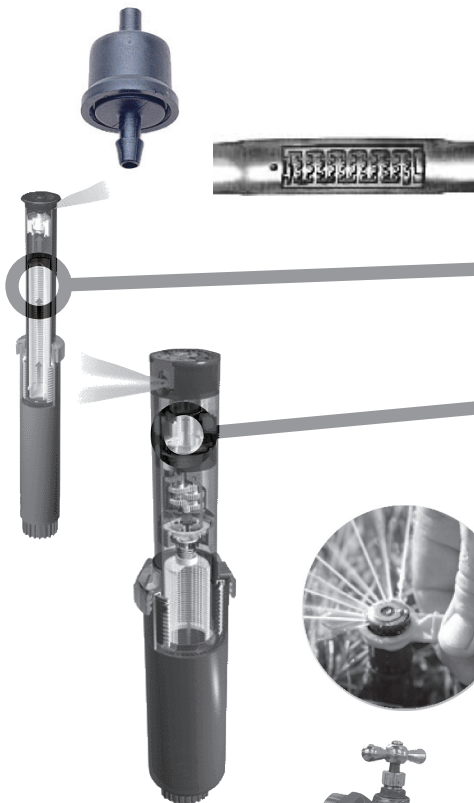

- Single station battery powered off faucet
- No plumbing or wiring
- Low-flow light-duty portable system

Multi-valve automation

- Multiple areas on one controller
- Complete site solution
- Heavy duty-permanent

Smart (ET) weather-based

- Saves up to 50% over set & forget methods
- Works like other multi-valve systems
- Set it for plant, soil & watering device & it adjusts to weather & daylight everyday without reprogramming

ET System Sensor
(Shown with optional ET WIND)
