

San Francisco Rainwater Harvesting Subsidy Program 2018-2019

Made In USA

Save \$\$\$ on Rainwater Barrels and Tanks

Subsidized prices limited to eligible San Francisco residents who apply and are approved for the program.
 Subsidy funds are limited. Prices subject to change without notice. Rules and application here:
<https://www.urbanfarmerstore.com/rainwater-harvesting-program-application/>

Our 50-gallon barrels feature a reversible "planter top" lid that can be used to grow annuals or herbs on top of the barrel making it both functional and decorative. The patented flexi fit diverter works on standard 2" x 3" and 3" x 4" (or round) downspouts and helps prevent overflows and flooding that plague conventional top-fill rain barrels and can damage a home's foundation. Can be assembled and installed in minutes. Locate near any downspout around the home, garage or out-building. Includes diverter, hole saw and all parts needed for installation into copper, aluminum, PVC, galvanized, and tin downspouts. Will not work on cast iron or ductile iron pipes. Garden hose ready!

205 gallon

DIAMETER
 2'11"
 (0.89m)

420 gallon

DIAMETER
 3'9"
 (1.15m)

\$449 **\$99 with subsidy**
 (+\$38.17 sales tax, limit 1)

\$649 **\$299 with subsidy**
 (+\$55.17 sales tax, limit 1)

50 gallon rain barrel ~~\$129~~ **FREE with subsidy**
 (+\$8.50 sales tax, limit 2) *Limited Time Offer*

Rainwater Harvesting Program

Don't let good water go to waste! Capture and use rainwater in your garden.

Through the San Francisco Public Utilities Commission (SFPUC) Rainwater Harvesting Program, residents, businesses and schools can receive generous discounts on rain barrels and cisterns.

Participants in the Rainwater Harvesting Program will receive either:

- A \$100 discount off the purchase of a pre-approved rain barrel, ranging from 45 to 60 gallons (limit 2 per customer). Each rain barrel includes a hose bib, overflow hose, and a connecting valve to join multiple barrels. Discounted downspout diverter kits are also available.

OR

- A \$350 discount off the purchase of a cistern, ranging from 130 to 750 gallons (limit 1 per customer).

If you need to disconnect your downspout from the sewer system to install your rain barrel or cistern, a plumbing permit is required from the San Francisco Department of Building Inspection. The SFPUC is also offering a rebate up to \$225 toward the cost of your permit fee.

For more information about the Rainwater Harvesting Program, visit sfwater.org/rainwater or contact our program partner, The Urban Farmer Store, at (415) 661-2204.

Services of the San Francisco
Public Utilities Commission

Rainwater harvesting is the practice of collecting and using rainwater from your roof or other impervious surfaces. Installing a rainwater harvesting system conserves drinking water used for landscape irrigation and reduces the amount of stormwater runoff from entering our sewer system.
